

Walk through Aviary for Exotic birds in UT Chandigarh

The Department of Forest & Wildlife, UT Chandigarh has developed two Walk through Aviaries at Nagar Van behind Sukhna Lake, Chandigarh for creating awareness among general public towards bird conservation especially the young minds on nature education and conservation. These Aviaries have been created for the exotic birds which are commonly bred in India. The common birds housed in the aviary include White Swans, Black Swans, Wood Ducks, Blue Gold Macaw, Cockatoo, Love Birds and Budgerigar etc.

The Walk through Aviary which has been developed provides ample space for each & every bird with 58 feet flying height with total ground area approx. 200x150 feet each for terrestrial birds and aquatic birds. The structure is designed in a way that it surrounds thousands of plants of varying canopies, which gives an ideal habitat, food and shelter for these birds so that they can freely fly and breed. It is believed that this structure would be the tallest structure of the country in Aviary domain.

The State-of-the-Art Bird Park for exotic birds is believed to bring laurels to the city and good names to the Government. As the aviary is located within the city areas and placed between the Rock Garden and famous Sukhna Lake, it is believed to attract other visitors/nature lovers too. The visitors shall get unique experience in the Walk through Aviary to sight the exotic birds in a near natural environment, which will create more awareness towards bird conservation and will enrich the knowledge of visitors on nature education and conservation of avi-fauna species.
